

FAMILY #13

(Information updated April 2024)

These are not descendants of Family #1

There were several other families who assumed the Gurulé surname, sometimes because they worked for the family, or for other unknown reasons.

These are the descendants of Joseph Gurulé and Maria Gertrudis Garcia de Noriega. The prenuptial investigation in NM Roots Ltd identified him as a Mestizo of unknown parents.

Note → each generation is indented...thus Jose and Maria Gertrudis are the parents of all children with #1 by their name. Then, for example, Maria de los Dolores Gurulé and her husband Manuel Antonio Gutierrez are the parents of all children with #2 by their name, and so on....

Descendants of this family have been very difficult to trace as they used so many varied names in the records, and often the records were very hard to read (some names are underlined to show "best guess" at the spelling). Not 100% positive on everything in this lineage, and notes (in red) have been entered to show inconsistencies. If you have accurate records for some of the questionable areas, please let [Angela Lewis](#) know so she can fix/update.
